

PCB-Relays

812HT PC-Board Power relay

The 812HT is a “sugar cube relay” which offers high ratings and high electrical life duration even in high ambient temperatures:

7A/250VAC 100,000 cycles at +125°C, UL approved
10A/250VAC 100,000 cycles at +105°C, UL and VDE approved
12A/250VAC 100,000 cycles at +85°C, UL approved

SONG CHUAN is offering the 812HT in either flux-tight or sealed version and is available with 1 N/O contact. The contact material for the 812HT is AgNi. The standard coil consumption is 0.36W – the dimensions of the relay are 21,4x16,4x17,3 mm.

With its high ratings the 812HT is particularly designed for household appliances (like ovens, cooking plates, coffee makers) and industrial equipments.

In conformity with the SONG CHUAN environmental policy the 812HT is in accordance with the RoHS requirements.
